

## Aquatec Product Catalogue for equipment – Land Based Fish Farming

Decades of experience in Recirculating Aquaculture Systems (RAS) projects, benefits all our customers today world-wide. Our equipment is developed and based on many years of experience and a well-known proven technology. Aquatec offer now our customer to benefit our unique products for land based fish farming.

### Aquatec Fish Tank Cleaner

Collect dead fish, faeces and waste feed in a user friendly installation  
Easy cleaning and non-blocking system that reduces stress on fish.

### Aquatec Oxygen Cone

Precise distribution of oxygen in high efficient fiberglass cones with low O<sub>2</sub> usage per kg fish.

### Aquatec Oxygen Stone & Emergency Oxygen Hose

For safety matters AQS assure oxygen supplying despite electrical break-down. Oxygen stones assure optimal diffusion.

### Aquatec Oxygen O<sub>2</sub> Generator

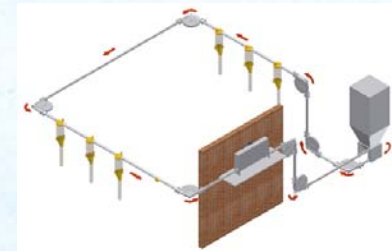

Based on high quality compressors and O<sub>2</sub> generators the AQS system offer a simple and reliable construction with low maintenance cost.

### Aquatec O<sub>3</sub> Ozone Generator

Our unique ozone equipment disinfects water – resulting in crystal clear water.

### Aquatec Feeding System

Our AQS Feeding System assures we match the fish appetite for optimal productivity – 24/7.

### Aquatec Hatchery & Incubation

Complete water cleaning system for hatchery with low water consumption – See our profile brochure for further information.

### Aquatec Grading Machine & Fish Pump

Sorting and grading equipment with sensible handling for fish welfare.

### Aquatec Bio Filter Media

Lifetime and easy cleaning media with excellent removal efficiency of nitrogen.

### Aquatec UV & Drum filters

The UV unit integrated in our system break down all given organic matter in a very economical scale.

### **Aquatec Pipe System**

Offering complete pipe system for the fish industry including pumps and sensors.

### **Aquatec PLC System**

Unique custom designed control and surveillance system to optimize your complete aquaculture.

### **Aquatec Vacuum Degasser**

Easy media cleaning system with high N<sub>2</sub> degassing efficiency.

### **Aquatec Fish Tank Degasser**

AQS Degasser contributes positively to the water temperature in the re-circulation system and assures better water quality.

### **Aquatec Sensors**

Wide range of sensors to control and surveillance complete aqua-culture system.

### **Aquatec Walkway & Platform**

A new way to access your tanks and production area in an environmental friendly material without maintenance

### **Aquatec Fish Tank**

PVC Mold system for easy build-up concrete foundation. Fiber glass and prefabricated concrete tanks.

### **Aquatec Sludge Treatment**

Complete sludge treatment system and Filter press to separate waste, sludge and water into valuable fertilizer.

### **Other Aquatec Equipment**

Aquatec Lime Dosing system secures non-blocking  
Aquatec Trickling blocks for degassing  
De-Phosphorescing systems  
Custom designed equipment on request  
Etc.

All units suitable for land based fish farming.
