

Aquatec UV Systems

Facts

- Low pressure - High Efficiency lamps
- 40% UV generation of the Lamp effect
- Maintenance without stops
- Cleaning without stops
Optimal placement of lamps
- Radiation chamber is stainless steel
- Quartz protection tubes
- Electronic ballasts
- Standard DIN connections
- Competitive pricing on replacement lamps

BENEFITS

- High UV dose versus energy consumption
- Low maintenance cost
- Easy to keep clean
- Low pressure loss – low head system
- No disturbance while maintenance / cleaning
- Low energy cost versus capacity
- Quartz tubes secure optimal temperature on lamps.
- Higher lamp performance due to the electronic ballast
