

Aquatec Vacuum Degasser

Aquatec Vacuum Degasser for reducing nitrogen gas (N₂) is designed with an integrated system for easy and quick cleaning of filter material inside the Vacuum Degasser

Facts

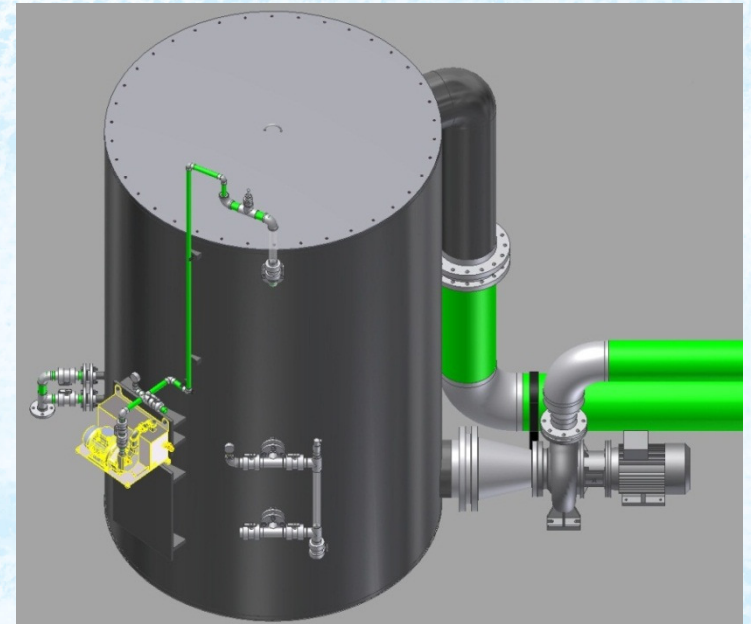

- Manufactured in PE and stainless steel
- Liquid Ring Vacuum pump
- Measuring flow, water level and vacuum
- Over flow alarm
- Cleaning system for filter media
- Operates down to -0,5 Bar

Benefits

- Easy filter media cleaning system
- Automatic water level control
- Alarm monitoring
- High N₂ ventilation efficiency
- High quality vacuum pump
- Small foot print

Aquatec recognizes an increasing focus on removing nitrogen gas (N₂) supersaturation in Recirculating systems and Flow-Through Systems.

Aquatec supply Vacuum Degasser in all sizes from hatchery to smolt / on-growing systems.

Aquatec manufactures also Vacuum Degasser in seawater resistant materials.

Due to the high vacuum and N₂ stripping efficiency - only a small side stream is required to get below 100% in main flow.
